DETAILED ACTION

Remarks

In response to applicant's Amendment, dated June 24, 2003, the examiner acknowledges the amendment to claims 1, 3, 5-7, 10-12 and 13. Claims 1-17 are pending.

On page 11 of the Amendment, the applicant notes that "since the present application only pertains to blinking and the specific stroboscopic phenomenon associated therewith, in order to differentiate this effect from other types of stroboscopic phenomena, the specification and the claims have been amended to refer to the 'blink effect.'"

Regarding the 35 U.S.C. 102(b) rejection of claims 1-17 as being anticipated by Heimbuch, et al. (US 5,448,314), the applicant makes the argument that the blanking periods shown in Heimbuch "are insufficient to induce the blink effect," and that "a person skilled in the art would never increase the blanking period much beyond the limits given by Heimbuch to insure that a single multi-color image is perceived by the eye, rather than three images, each being monochromatic." The examiner has considered the applicant's arguments in light of the amended claims and withdraws the rejection.

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest a digital projector that includes an optical modulator which generates a series of images corresponding to digital data, the images are separated by blank intervals, and wherein the optical modulator generates the black intervals with a duration selected to induce a blink effect in the eye of a viewer.

Art Unit: 2851

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
